

Helping within the community

Students from "Aleko Konstantinov" School of Education in Pravetz working on "Education +" project regularly visit two elderly women once a week. These are Tsanka Vassileva, living at # 7 "Mladost" Str., and Radka Petkova, living in bl.104. They find it difficult to go to the store alone, buy the necessary things, clean up or just pick up wood. That is why the students go to their places once a week to help them. During this cold winter, they were picking up wood, cleaning, shopping for food, medicine, household items, and other products. They then talk with them, share their problems, experiences, and thus entertain and also listen to the wise words the elderly give them as advice. The girls from the school have been doing this for two years now, since the project started, and are planning to continue helping the two ladies.
